Duro-Last® Can Help Your Building Recover After The Storm

If the roofing system on your building has lost its ability to remain watertight...

REPLACE IT WITH THE DURO-LAST® ROOFING SYSTEM.

- Prefabrication of the Duro-Last roofing system means that 80–85% of membrane seaming is done in a controlled factory setting, virtually eliminating the risk of rooftop leaks—even in the roughest, wettest weather.
- The Duro-Last roofing system is The Proven Performer®, withstanding extreme weather in all seasons throughout the United States.
- The mechanically-attached Duro-Last roofing system meets the wind uplift requirements of all national building codes as well as Florida wind codes.
- Installation is clean and easy without disrupting your building's daily activities.
- Duro-Last's white membrane reflects over 86% of the sun's energy, and can help reduce your air conditioning expenses.
- Duro-Last is so confident in the durability of our roofing systems that we protect commercial and industrial installations with the best warranties in the industry. Our standard, comprehensive 15-year No Dollar Limit (NDL) warranty is transferable, has no exclusions for ponding water, and provides coverage against consequential damages that result from defects in the Duro-Last material and/or installation workmanship. Duro-Last also has 20-year warranties available.

After taking on Hurricane Hugo, the Duro-Last roof on the Charleston, South Carolina, Piggly-Wiggly remained intact.

The Duro-Last roofing system protected the Par Printed Forms, Inc. building from Indianapolis, Indiana, tornadoes.

Don't let another storm threaten your building occupants and contents.
