UNIQUE EICHLER HOMES DEPEND ON DURO-LAST FOR WATERTIGHT PROTECTION.

For more than 50 years, the Eichler-style and other innovative homes have been cherished by those who own and reside in them. With their flat or low-pitched roofs, open floor plans, and centrally located atriums, these homes have provided an open-style living environment for thousands of home owners in the west.

Because of the distinctive architectural design of these "open beam" modern-style homes, home owners look for superior roof systems like Duro-Last to solve problems and protect their unique homes. With Duro-Last, any home with a flat roof can benefit from a leak-proof roofing system that is not only energy-efficient and durable, but attractive looking as well.

CUSTOM PREFABRICATION IS THE DIFFERENCE

The Duro-Last roofing system is perfect for any flat or low-sloped application, which is why many Eichler home owners have installed Duro-Last.

Each Duro-Last project is prefabricated to fit every roof precisely. By performing 80-85% of membrane seaming in our controlled factory environment, Duro-Last reduces the potential for rooftop installation errors and leaks.

Also, custom fabricated stacks and curb flashings eliminate the majority of on-site work from the most critical areas of the roof – transitions and penetrations.

DESIGNED TO MEET YOUR HOME'S NEEDS

Although ponding water is a common problem with many flat roof homes, the Duro-Last membrane is not affected by such conditions.

The Duro-Last solution allows several approaches to meet your needs and budget. During installation, steps can be taken to reduce or remove the ponding water altogether from your home's roof, such as installing a tapered insulation system to ensure water will flow off the roof.

Does your home need additional insulation R-value? Any amount of insulation can be added under the Duro-Last membrane. With added insulation, your home will remain comfortable in the winter. Plus, you can stay cool in the summer due to the Duro-Last roofing system's reflective qualities.

DURABLE

The Duro-Last roofing system is fire retardant, resistant to chemicals, grease, high winds, and punctures, and easily accommodates wide temperature extremes. Duro-Last's custom flashing resists ponding water and helps solve roof problems before they happen.

VIRTUALLY MAINTENANCE-FREE

Unlike other roofing systems that require ongoing maintenance, such as re-coating, patching or replacement after only a few years, the Duro-Last roofing system is your best long-term investment. Once installed, a Duro-Last roof is watertight and virtually maintenance-free. There will be no "hidden" maintenance costs when you install Duro-Last, only high quality materials that will provide a leak-proof roof for years to come.

NO DISRUPTIONS DURING INSTALLATION

Installation is quiet and safe without loud machinery, hazardous materials, noxious fumes, hot tar or mess. A new Duro-Last roofing system can often be installed over an existing roof without an expensive tear-off, virtually eliminating debris that could disrupt your home's daily activities or damage valuables.

Every Eichler home has different needs, and a thorough evaluation of your roof's current condition will help define the proper course of action. Whether you can re-cover your old roof is dependent on local building codes and how many roofs are currently in place. Many Eichler homes increase in value with a complete restoration of all rooftop-related items.

ENERGY-EFFICIENT

The Duro-Last white membrane is highly-reflective throughout its life span on the roof, saving significant energy and money for building owners all over North America.

Organizations such as the California Energy Commission have seen the benefits of "cool roofing" and highly recommend the use of reflective roofing systems like Duro-Last to lower energy consumption, combat energy shortages, and help reduce smog and the urban heat island effect that is prevalent in the west.

AN AESTHETICALLY-PLEASING AND CODE COMPLIANT ROOF

Many Eichler homes have roofs that are visible from the ground. Installing Duro-Last means you will be getting a very nice-looking roofing system that has met or exceeded all major fire and wind code requirements as well as regional approvals throughout the country.

PROFESSIONALLY INSTALLED

The "World's Best Roof"® is installed by authorized contractors who can draw on the expertise of Duro-Last's designers, engineers, and quality control technicians to ensure that every roof is installed to specification.

DELIVERS LONG-TERM VALUE

Custom prefabrication. Energy savings. Durable, leak-proof, virtually maintenance-free performance. Installed by authorized, professional contractors. The Duro-Last roofing system is the best long-term investment for your Eichler home.

PROTECT YOUR EICHLER HOME WITH THE "WORLD'S BEST ROOF"® — THE DURO-LAST ROOFING SYSTEM.
