The Duro-Last® **COOLZONE®** Roofing System

IT'S THE BEST THING UNDER THE SUN!

THE DURO-LAST® COOL ZONE® ROOFING SYSTEM KEEPS YOUR BUILDING COOLER...

ENERGY-EFFICIENT

The Duro-Last white membrane is highly-reflective throughout its life span on the roof, saving significant energy and money for building owners all over North America. It's the "World's Coolest Roof" for government buildings.

HELPS MEET EXECUTIVE ORDER 13423

In 2007, Executive Order 13423 was introduced to strengthen federal environmental, energy, and transportation management. Agencies must reduce energy intensity (energy consumption per square foot of building space) by 3 percent annually through 2015 or 30 percent by 2015 relative to 2003. The Cool Zone roofing system can help agencies meet this goal.

Duro-Last is a charter member of the Cool Roof Rating Council (CRRC) and a member of the United States Green Building Council (USGBC). The Duro-Last Cool Zone® roofing system can also help in obtaining credits toward LEED® and LEED-EB certification.

SUN-PROOF AND LEAK-PROOF

Through independent accelerated weathering tests and projects in the field, our membrane has stayed flexible and watertight. The Cool Zone membrane also resists the negative effects of prolonged ultraviolet exposure and helps reduce heat stress on rooftop equipment.

DURABLE

The Cool Zone roofing system is fire retardant, resistant to chemicals, grease, high winds, and punctures, and easily accommodates wide temperature extremes. Once installed, a Duro-Last roof is watertight and virtually maintenance-free.

...NO MATTER HOW HOT THE OUTSIDE TEMPERATURE

CUSTOM PREFABRICATION IS THE DIFFERENCE

The Cool Zone roofing system is perfect for any flat, low-sloped, new or retrofit application.

Every Cool Zone project is prefabricated to fit each roof precisely. By performing 80-85% of membrane seaming in our controlled factory environment, Duro-Last reduces the potential for rooftop installation errors.

BUSINESS AS USUAL

Year-round installation is quiet and safe without loud machinery, hazardous materials, noxious fumes, hot tar or mess. A Cool Zone roof can often be installed over an existing roof without an expensive tear-off, virtually eliminating debris that could disrupt building activities or damage sensitive equipment.

BACKED BY THE INDUSTRY'S BEST WARRANTIES

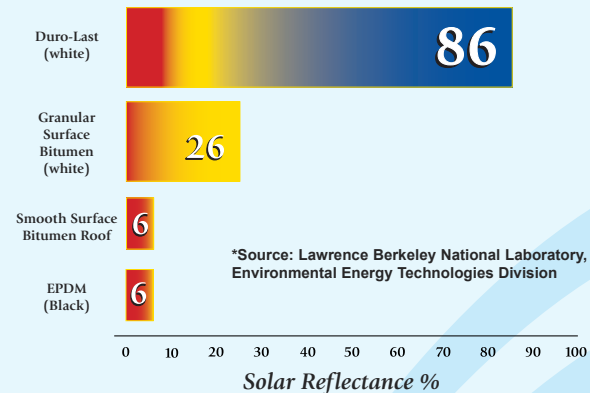

Duro-Last is so confident in the durability of our roofing systems that we protect commercial and industrial installations with the best warranties in the industry. Our standard, comprehensive 15-year No Dollar Limit (NDL) warranty is transferable, has no exclusions for ponding water, and provides coverage against consequential damages that result from defects in the Duro-Last material and/or installation workmanship. Duro-Last also has 20-year warranties available.

GET LONG-TERM VALUE WITH THE DURO-LAST COOL ZONE ROOFING SYSTEM. IT'S THE BEST ROOF UNDER THE SUN.
