Duro-Last is building Iowa's economy, one roof at a time!

WITH THE
“WORLD'S BEST ROOF”®
MANUFACTURED RIGHT HERE
IN YOUR BACKYARD...

**WHY WOULD YOU
GO ANYWHERE ELSE?**

Duro-Last® is the obvious choice for Iowa building owners because WE MANUFACTURE THE “WORLD’S BEST ROOF”®

Manufacturing is an important part of Iowa’s economy, generating one-fifth of the state’s gross domestic product and accounting for more than 10% of Iowa’s employment. We’re proud that Duro-Last® Roofing, Inc. has been part of Iowa’s manufacturing community for over 13 years.

WHY IOWA?

Iowa’s location provides a good point of distribution to other states, and we have produced over 200 million square feet of roofing material in Iowa for customers throughout the Midwest and Plains. In addition, the state of Iowa provides Duro-Last with skilled and loyal employees, many of whom have been with the company since we opened our doors in Sigourney.

WHY DURO-LAST?

Energy-Efficient: Energy conservation has become an important element of everyday life at home and in the workplace, and Duro-Last recognizes the significance of producing a product that is highly energy-efficient and will deliver real utility cost savings.

Durable: The Duro-Last roofing system is fire retardant, resistant to chemicals, grease, high winds and punctures, and easily accommodates wide temperature extremes. Once installed, a Duro-Last roof is watertight and virtually maintenance-free.

Custom Prefabricated: Every Duro-Last project is prefabricated to fit each roof precisely. By performing 80-85% of the membrane welding in a controlled factory environment, Duro-Last reduces the potential for rooftop installation errors and leaks.

Professionally Installed: The “World’s Best Roof” is installed by authorized contractors who can draw on the expertise of Duro-Last’s designers, engineers, and quality control technicians to ensure that every roof is installed to specification.

Business As Usual: Installation is quiet and safe, without loud machinery, hazardous materials, noxious fumes, open flames, hot tar or mess. A new Duro-Last roofing system can often be installed over an existing roof without an expensive tear-off, virtually eliminating debris that could disrupt building activities or damage sensitive equipment.

Backed By The Industry’s Best Warranties: Duro-Last is so confident in the durability of our roofing systems that we protect commercial and industrial installations with the best warranties in the industry. Our standard, 15-year No Dollar Limit (NDL) warranty is transferable, has no exclusions for ponding water, and provides coverage against consequential damages that result from defects in the Duro-Last material. Duro-Last also has 20-year warranties available.
