Government facilities trust Duro-Last.

**THE DURO-LAST®
ROOFING SYSTEM**

**Providing Watertight
Protection To
Government Buildings
For Over 30 Years**

Ohio Contract Number
775640050

GSA Schedule
Contract GS-07F-5689P

As an approved contractor for the Ohio STS (State Term Schedule) government program, Duro-Last® Roofing, Inc. makes purchasing and installing a leak-proof and energy-efficient roofing system for Ohio government buildings, simple and hassle-free.

For virtually any state of Ohio government project, Duro-Last can cut through the “red tape” and fulfill your roofing needs with The Proven Performer® - the Duro-Last roofing system.

ONE-STOP SHOPPING

Duro-Last provides “one-stop shopping” for state government buyers, who can purchase both the roofing system and “ancillary services” directly from Duro-Last. Ancillary services, provided by authorized Duro-Last contractors, include the roof installation as well as the supply of other products or services that are needed to complete the installation.

To find out more about Duro-Last’s contract with the state of Ohio, go online to the following link:
http://procure.ohio.gov/OrigContract/776564B_OC.pdf.

DURO-LAST HELPS FEDERAL, STATE, AND LOCAL FACILITIES MEET LEGISLATIVE REQUIREMENTS FOR ENERGY REDUCTION

Presidential Executive Order 13423 requires that by the year 2005, the energy consumption of all federally-owned buildings must be reduced by 30%, and by 2010, 35%. Many state and local governments have also recognized the cost-saving benefits of reflectivity. Cool roofing legislation is on the books in Chicago, Atlanta, California, and other locations, and several states are in various stages of incorporating cool roofing language into building codes.

The white Duro-Last roofing system reflects up to 87% of the sun’s energy and loses only 1% of reflectivity after three years of weathering (based on ENERGY STAR® roof products testing criteria). This high reflectivity is saving significant energy costs for government facilities throughout the United States.

Duro-Last is a charter partner in the ENERGY STAR® Roof Products Program; a charter member of the Cool Roof Rating Council (CRRCC); and a member of the United States Green Building Council (USGBC). The Duro-Last roofing system can also help in obtaining credits toward LEED® and LEED-EB certification.

DURO-LAST ROOFING SYSTEM OFFERS A WEALTH OF FEATURES AND BENEFITS:

Prefabrication Makes The Difference

- Every Duro-Last project is pre-engineered and designed to address specific needs of each roofing application.
- 80-85% of membrane seaming is completed in our controlled environment for less chance of installation errors in the field and future leaks.
- Custom fabricated stacks and curb flashings eliminate the majority of on-site work from the most critical areas of the roof – transitions and penetrations.

Easy Installation And Low Maintenance

- Can be installed over most new or existing substrates.
- Need for costly tear-offs and disposal can often be eliminated, reducing debris that could damage sensitive equipment.
- Hot air welding bonds all Duro-Last field seams; no chemicals, torches or other unsafe seaming methods are used.

- Membrane is non-curing for excellent welding ability for life of system; patches, curbs, stacks or other alterations can be easily heat-welded to Duro-Last membrane.
- Duro-Last membrane is watertight and virtually maintenance-free.

Durability

- Fire retardant.
- Resistant to chemicals, grease, high winds, punctures.
- Accommodates wide temperature extremes.

Business As Usual

- Installation is quiet and safe with no disruptions to daily building activities.
- No loud machinery, hazardous materials, noxious fumes, hot tar or mess.

Comprehensive Warranty Coverage

- Duro-Last protects government buildings with either a 15-year full warranty or a 20-year prorated warranty.
- Both warranties are transferable and provide maximum protection.
- Warranties include coverage for consequential damages that result from defects in the Duro-Last material and/or installation.

Code Compliance Offers Government Customers Peace Of Mind

- Duro-Last has met or exceeded all major fire/wind code requirements, and obtained necessary regional approvals throughout the United States.
- Factory Mutual (FM) ratings of 1-60, 1-75, 1-90, 1-105, 1-120, 1-135, 1-150, 1-165, 1-195, 1-210, 1-270, 1-435 & 1-495.
- Underwriters Laboratories (UL) rated as a Class A material.
- Participant in all major technical committees in roofing industry, plus the American Society of Testing Materials (ASTM) and the Single-Ply Roofing Industry (SPRI).

THE DURO-LAST ROOFING SYSTEM IS THE BEST LONG-TERM INVESTMENT FOR YOUR GOVERNMENT FACILITY.
